

M FLUID MONITORING C BOX

The MC Box is a private use fluid monitoring system that is connected to the pump, pulse meter and optional additional accessories allowing the control of any fluid. The MC system consists of a multi-user panel and software kits, which enable either a hard wire or wireless connection.

Performance:

The MC Box has a capacity to manage up to 120 users with either user keys or a 4 digit PIN. It can calculate the consumption of each user and vehicle and track the total amount of fluid dispensed over a designated period; all with custom software that enables control of up to 16 MC Box units at a time.

El MC Box es un sistema de gestión de fluido de uso privado que se conecta a la bomba, medidor de pulso y otros accesorios opcionales permitiendo el control de todo tipo de fluido. El sistema MC consiste en un panel de multi-usuario y paquetes de software, los cuales permiten conexión directa o inalámbrica.

Capacidad:

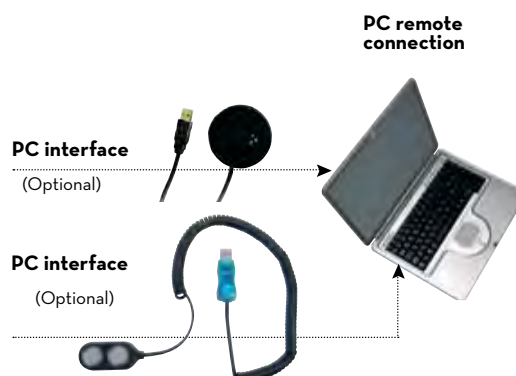

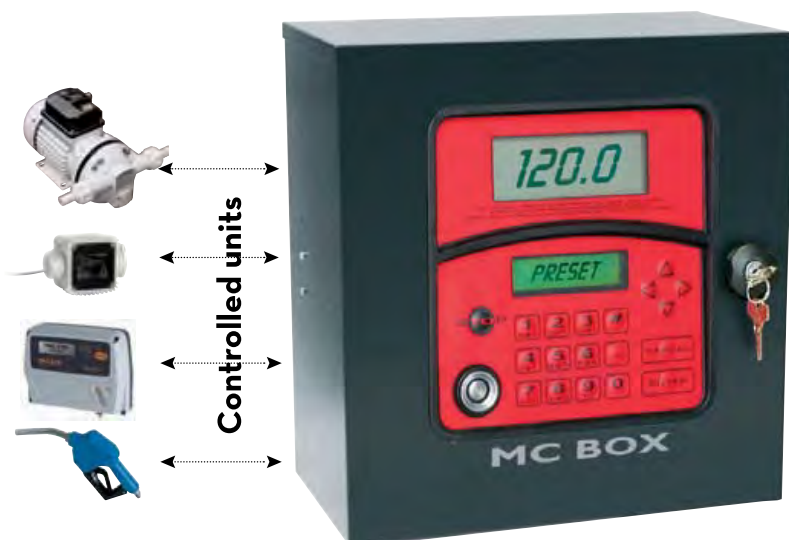

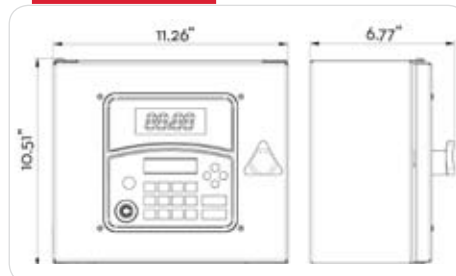

El MC Box permite el manejo de hasta 120 usuarios a través de llaves personales o códigos numerales (PIN). Cuenta con capacidad de calcular el consumo de cada usuario y vehículo y además grabar el total de fluido suministrado a través de un periodo de tiempo, todo con software personalizado que permite el control de hasta 16 unidades de MC Box a la vez.

INCLUDES

Easy access to electrical connection

DIMENSIONS

A

PC interface

Code **F1271000C**

Includes:

- 1 USB converter
- 1 CD with PC software

B

Key kit with USB plug

Code **F14144040**

Kit includes:

- 1 red manager key
- 10 yellow user keys
- 1 key reader to transfer data to PC
- CD with PC software

Upon request:

Manager key

Code **R12496000**

Includes:

- 1 red key

User key

Code **R15904000**

Includes:

- 10 yellow keys

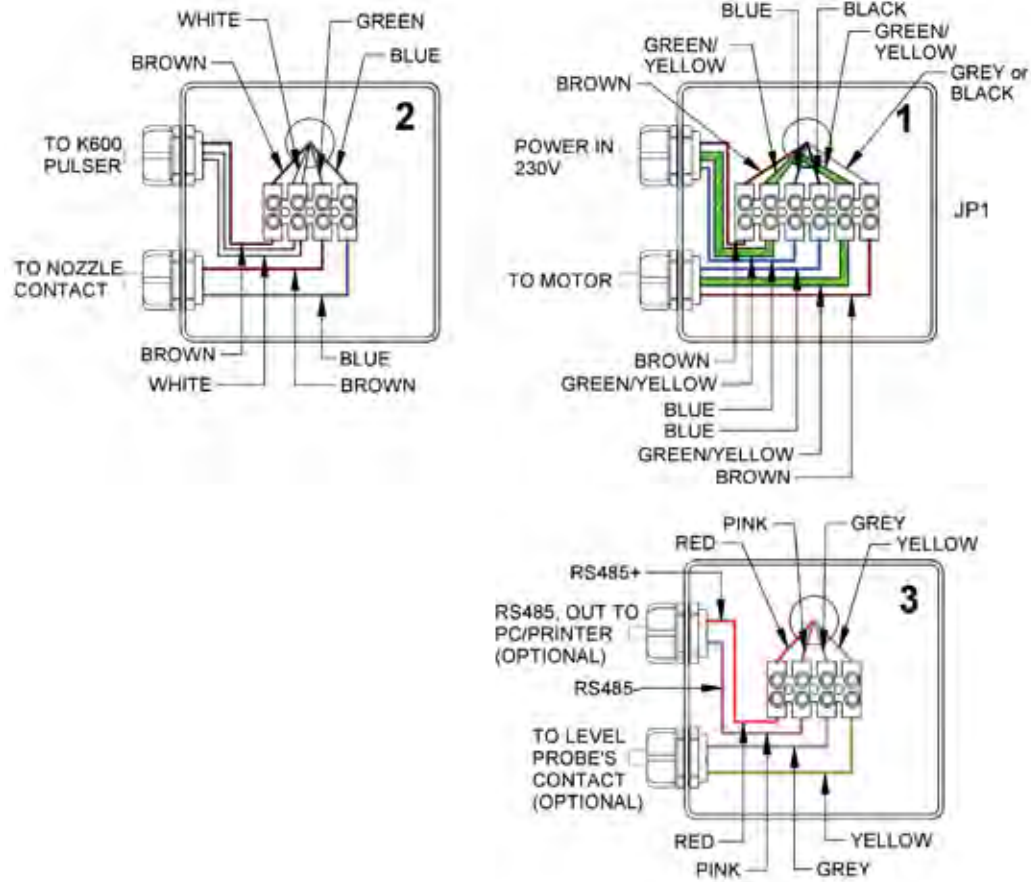

Key for language

translation Includes:

- 1 black key
- English: **F15358000**
- Português: **F1400000A**
- Español: **F1396800A**
- Français: **F1390700A**
